Advanced Loading System Stretcher (ALS)

The first of its kind, the powered stretcher and its loading system offer a realistic, cost effective solution to upgrading your fleet from manual to powered stretcher. The ALS stretcher features full electric operation with integrated changeable battery. The ALS stretcher eliminates ALL the OHandS issues associated with the manual handling of patients.

- Carbon Fibre frame and patented loading system
- Top Rail System for ease of repositioning accessories
- 360° Castoring offering unparalleled manoeuvrability
- Heavy duty actuated lifting
- Removable side rail
- Adjustable IV Pole positioner
- Infinite loading height capability
- Same day loading tine retrofit
- In-vehicle charging and back-up battery
- Sealed and contoured mattress with bacteria control cover and pressure control overlay

- Monitor Bridge 305BR
- Baby Seat Harness 304BCH
- Baby Capsule Harness 305CH
- Infant Harness 304PED
Drop Leg Stretcher (305 Series)

Strong, reliable and inexpensive to maintain, the 305 Series stretchers offer excellent lifetime value for money. The 305 is a tailor made multi height, drop leg stretcher built to fit the pre-requisites of individual services. Available options include Trendelenburg, Top Rail Accessories and 360° castoring.

- Unique top rail system
- Stainless steel running gear for strength and reliability
- Gas powered backrest for patient comfort
- 4 Extension handles for added control
- Long wheel base and 170mm wheels for added stability
- Sealed multi-layer contoured pressure relief mattress
- Tailored markings for individual services
- Swing out head extension for tall patients
- Moulded alloy brakes
- Multi-height load levels – 5 heights

OPTIONAL ACCESSORIES

410 Webbing Belts
441 Flotation Blocks
472 Patient Shield
497 Wheel Kit
415-1 Lifting Sling
415-F8 Lifting Sling
**Rescue Litter (310)**

This is the ideal extrication device for high angle, confined space, horizontal and vertical rescue. Suitable for crane lifts, cliff side rescues or helicopter retrievals, the stainless steel construction means this stretcher is extremely rigid and the design protects the patient’s body and limbs from further injury. The 310 comes complete with lifting sling, carry handles to sides and ends while the whole unit folds into a neat backpack for transport into remote locations.

QuickLay Fire Attack System

Rapid, Reliable Hose Deployment for fighting fires - No kinks, No tangles, No excess friction or catch points!

The QuickLay System is comprised of three purpose designed hose stowage deployment packs, the Attack Pack, the Lay Pack and the Big Lay Pack. The packs are designed with a safe and efficient method to deploy the hose inside them. Depending on the incident a different QuickLay technique can be adopted.

All three packs contain the following features:

- Light weight and offers both shoulder strap and hand carry handles
- Secures all components and is effortlessly deployed
- Coloured to indicate its role in the hose lay system
- Easily packed – Instructions included in each pack
- Hose spanner and door chock stowage space
- Variable back strap placement for maximum fire fighter comfort
- Protects the hose from damp and rain
- Provides 10cm of height adjustment – allows for canvas as well as rubber hose

**Attack Pack (FBRP-31)**

The Attack Pack stores an attack line, fire fighting nozzle, adapters and reducers, it deploys 30m of coiled 38mm (1.5") hose for instant, reliable deployment at the fire front. The Attack Pack can be deployed in restricted spaces like high-rise fire stairs, a terrace court-yard or a balcony.

- Rapidly coils the hose straight from the pack – avoids tangles and kinks
- Two-stage deployment designed for limited light and challenging environments
- Nozzle diffuser teeth protector

Standard Colour - Red

<table>

<tr>
<th>Height</th>
<th>Width</th>
<th>Depth</th>
</tr>
</thead>
<tbody>
<tr>
<td>480mm</td>
<td>930mm</td>
<td>70mm</td>
</tr>
</tbody>
</table>

**Lay Pack (FBRP-32)**

The Lay Pack stores an attack line, adapters and reducers. It deploys hose ‘on-the-fly’ or as the fire fighter covers the distance – ideal for laying hose in a restricted space or simply stretching hose between the water supply and the Attack Pack.

- Lays the hose straight from the pack – avoids tangles and kinks

Standard Colour - Blue

<table>
<thead>
<tr>
<th>Height</th>
<th>Width</th>
<th>Depth</th>
</tr>
</thead>
<tbody>
<tr>
<td>1010mm</td>
<td>200mm</td>
<td>70mm</td>
</tr>
</tbody>
</table>
Big Lay Pack (FBRP-33)
Similar to the Lay Pack, however designed to store and deploy a larger hose. The Big Lay Pack deploys 70mm of flaked line to allow the deployment of breached and controlled Attack Packs at two points. The Big Lay Pack can also store a gated breeching piece to support two attack lines, ideal for a substantial weight of attack at a larger fire incident.
- Lays the hose straight from the pack – avoids tangles and kinks

Standard Colour - Black

Pannier Bag (D655MB)
Tailor made first responder bag to fit in motorcycle panniers. Drug module (D655DM) designed to fit within main bag, available separately.

Flare Pouch (D599)
Designed to safely secure, store and protect distress flares wherever they are needed.

D558
Insulated bag for the transport of blood products.

D593
Tailor made for police forensic teams.

DNets
Neo Natal drug kit designed in conjunction with Neo Natal specialists.

Accessories shown are for illustration purposes only and are not included.
Neonatal

**Baby Seat Harness (304BCH)**
This harness is designed to restrain a baby seat to the 304 or 305 Series stretcher.
- Material 50mm webbing
- Pattern stitching
- Seat belt adjusters
- Tested to allow an infant up to 22kg

**Paediatric Harness (304PED)**
This harness is designed to interface with standard DHS 20G harness to secure paediatric patients on the 305 Series Stretcher.
- Material 50mm webbing
- Pattern stitching
- Seat belt buckles and adjusters

**Baby Capsule Harness (305BCH)**
This harness is designed to restrain a baby capsule to the 304 or 305 Series stretcher.
- Material 50mm webbing
- Pattern stitching
- Seat belt buckles and adjusters

**Neonatal Stretcher 305NN**
- 170mm wheels for smoother ride
- Simple moulded alloy brakes
- Minimum maintenance required
- Easy load brake release system and 170mm loading wheels
- LOS locking system
- Handles at both ends

**Humidicrib Harnesses (585)**
Harnesses to suit all major brands of humidicribs are available for stretchers and variants can be created to suit other applications and other equipment. The harnesses interface with the patient harness points and are fully tested to meet the Standard AS/NZ4535.

The crib harnesses also feature interlocking infant restraints in 3 sizes.
- Material 50mm webbing
- Pattern stitching
- Seat belt buckles and adjusters

**OPTIONAL ACCESSORIES**

- 590 Harness
- 593 Rain Cover
Aircraft Retrieval Stretchers

Aircraft Drop Leg Stretcher (360)

As used by leading retrieval service providers including Air Ambulance and Royal Flying Doctors Service. Complete with fold away roller wheels for manoeuvring inside aircraft, and fully contoured mattress, the perfect solution for the Aero Medical industry.

- 20G Harness
- Adjustable backrest

Sports Kit
Features a choice of Two-pole Litter or Scoop Stretcher and Carry Bag, Speed Clips, Splints, Special Ops Hi-Vis Vest and First Aid Pack.

Rescue Kit
Features 309-7 Basket Stretcher, Patient Shield and Wheel Kit, D7000 Retrieval Backpack and Drug Module or First Aid Pack.

Spinal Kit
Features 390 Series Spineboard, 589 Headblocks and five Speed Clips.

Evac Kit
Features 531 Easy Fold Chair, Stair Descender and D700 First Aid Kit.
*Optional inclusion of Lateral Stifneck® Select Collar
Carbon Fibre Bridge (305BR)
3 piece, flat pack Carbon Fibre Monitor Bridge designed to integrate with the TRS on the 305 Series and ALS Stretchers. Strong, light and compact, this is the ultimate in monitor bridges. Supplied with accessory straps.

Bariatric Carbon Fibre Bridge (600BR)
Wider version of the 305 built specifically for the 600PLS Bariatric stretcher.

Aircraft Monitor Bridge (360BR)
Monitor bridge designed to suit the 360 Aircraft Drop Leg Stretcher.

Helicopter Bridge (305BRH)
Custom built powered swivel bridge top that attaches to the 305BR with anchor points for syringe pumps, Oxylog and ProPaq or whatever your specific equipment needs.

Stainless Steel ECMO Bridge (600TRAN and 600ECMO)
Heavy duty transfer bridge with attachment for ECMO retrievals.
Patient Cover (408)
Clear plastic patient cover to protect the patient from adverse weather. Suitable for use on all DHS stretchers.

Floatation Blocks (441)
Highly buoyant blocks that attach to the side of any DHS basket type stretcher to assist keeping the basket and patient afloat. Easily stored within the basket stretcher for stowage.

Cycle Counter
Aids in the monitoring or your stretcher movements for maintenance purposes.

Patient Shield (472)
Suiting all DHS Basket Stretchers, this tinted hard plastic shield protects patient from the sun and further injury during extrication, while maintaining access to and visibility of patient.

Wheel Kit (497)
Attaches to basket stretchers for easy transport.
**Head Blocks (589)**
Adjustable to all patients, these light, easy to use and clean blocks suit all scoop and spineboards.

**Trendelenburg**
An easily operated 15° angled Trendelenburg to raise the foot end of the stretcher deck.

**Stifneck® Select Collar**
The quickest and easiest-to-use adjustable collar on the market providing outstanding immobilisation. All you have to do is measure the patient, select the size, adjust and lock! Easy access for pulse checks, advanced airway procedures, and visualization through oversized trachea hole. There is room for large fingers to slide through the rear panel opening for cervical palpation. Radiolucent, MRI and CT scan compatible.

**Spineboard and Aussiscoop Stretcher Bag (527)**
Bag designed for the Aussiscoop stretcher and spineboards.

**Grab Handle (600GH)**
Multi-functional handle designed specifically for use with the TRS.
Swing Handle (600PP)
Designed specifically to help manoeuvre the 600PLS stretcher.

Rescue Litter Floatation Blocks (310F)
For use with Spineboards, basket stretcher and 310 Rescue Litter for water rescues.

Skids (310SK)
Set of 2 skids for 310 Rescue Litter for snow and sand use.

Carry Bag for 306-5 (452A)
Carry bag designed for the 306-5 Two Pole Stretcher.

Carry Bag for 306-7 (452)
Carry bag designed for the 306-7 Dual Fold Stretcher.
Belts and Restraints

Webbing Belts
- Webbing belt with plastic buckles 2 part (410)
- Webbing belt with metal buckles 2 part (410M)
- Webbing belt with metal buckles 2 part for aircraft (410MA)
- Webbing belt with 1 part plastic buckles (411)
- Webbing belt with 1 part metal buckle for aircraft (411A)
- Webbing belt - black with 1 part plastic buckle (412)
- Yellow version of the 412 (412Y)
- Orange version of the 412 (412O)

Speed Clip Belts
Speed clip belts with Velcro fastening to suit scoop stretcher and spineboards.

Demand Valve (0700)
Lifting Sling with c/w Brother Clip (414)

Utilises an easy-to-use C/W Brother Clip ideal for rescue situations without a helicopter. For use with DHS Basket stretchers.

Standard Profile Lifting Sling (415-1)

Features large lifting ‘D’ ring for use with DHS Basket stretchers, helicopter and other rescue situations.

415-K includes 4 Karabiners

- Long Strap Length – 810mm
- Short Strap Length – 600mm

Low Profile Lifting Sling (415-FB)

Lifting Sling designed for use with DHS Basket stretchers, helicopter or rescue situations where a shallow lifting height is required.

- Long Strap Length – 1200mm
- Short strap Length – 1000mm

Aircraft Lifting Sling (415FBK/AC)

Lifting Sling with 5 Karabiners to suit DHS Aircraft Basket Stretcher.

Karabiner (415K)

Karabiners available in carbon, stainless or tri-lock.
Hi Vis Vest (D323)

Bespoke operational vest available with 3-phase EL lighting. Cool, lightweight and very hi-vis.

- Lightweight Hi Vis breathable mesh body fabric
- Camel Pack pouch plus 4 sealable utility pockets
- AA Battery powered 3-phase flexible EL piping lights
- Radio securing epaulettes - left or right handed
- Removable service patches front and back
- Elasticised mobile and stationery pocket
- Adjustable side gussets
- Operator safety drag handle
- Easy clean front panel fabric

Paramedic Vest (D322)

Range of sizes available.

Instrument Trolley (475)

Constructed from brushed polished stainless steel this sturdy trolley features rails on upper and lower shelves, a large capacity drawer and easy-roll castors making it perfect for any medical environment.

Transplant Trolley

Designed for the swift smooth movement of vital equipment between destinations. Light, strong and compact the trolley folds down to fit a standard car boot.

Torch Kit

Complete Emergency unit with torch, re-charge unit, directional wand, belt clip and power cord.

Robin Safety Shears

Heavy duty, multi-purpose, German stainless steel shears with hammer feature.

- Smashes and knocks out car and airplane windows easily
- Cuts seat belts and shoulder harnesses
- Cuts through clothing
